# 10mm Embossing IMPULSE HAND SEALERS

## FEATURES

- Impulse sealing – no warm up time needed
- Wider meshed seal width (10mm)
- Variable temperature control

**PFS-200B** and **PFS-300B** are impulse hand sealers with a 10mm meshed or embossing code seal. The coding function is located on the silicone rubber. The sealers can seal material up to 20mil or more in total thickness.

Impulse hand sealers seal poly bags and any thermoplastic materials quickly and efficiently without a warm-up time. The PFS-series of sealers are equipped with a plug-in electronic timer to control the sealing time needed for different material thicknesses. Once the timer is set, the sealers will provide a consistently flat seal. We recommend that the operator hold the seal bar down for a few seconds after the light goes out to ensure that the seal has enough time to cool and set.

Manufacturers replacement kit includes 1 element, 2 PTFE covers, and 1 number set for coding.

Silicone Coding Rubber

SPECIFICATIONS	PFS-200B	PFS-300B
Power Supply	110V	110V
Watts	1000W	1200W
Seal Length	8"	12"
Seal Width	10mm	10mm
Weight	14lbs	14lbs
